Sta-Dri® Desiccant Bags Case Study

Customer: Corrugated and
Finishing Equipment OEM

Products Used: Beach SD-16,
SD- 32, SD-64 Sta-Dri®
Desiccant Bags

Applications: A Mid-Atlantic
Corrugated and Finishing
Equipment OEM branch was
having significant quality issues
when shipping their machines
overseas. New equipment was
arriving with surface rust and
malfunctioning control boxes due
to moisture. Beach Filters and
their local authorized distributor
worked closely with the customer
to specify the size and number of
Sta-Dri® bags for each area in the
shipment. Today, every shipment
that leaves the USA is packed
with Sta-Dri® desiccant bags,
ensuring a dry, rust-free delivery
anywhere in the world. Use of the
Sta-Dri® bags were later
expanded to domestic shipments
where they are inserted in
electrical control enclosures to
eliminate moisture and protect the
sensitive electronic components.

Other Merchandising:

• Both Technical Sales sheets and
brochures are available on
beachfilters.com for download.
Use them in the next sales
meeting as a reminder to your
team of this useful
problem-solver.

**Testimonials: needed for
compressed air filters,
breathers and Sta-Dri desiccant
pouches. Fill out the form on

Stop Corrosion and Mold in Storage and Shipping

Prevention is low cost: Protect your customers' products from
corrosion and mold: Safe, non-toxic Sta-Dri® and Container
Dri® II desiccant pouches absorb moisture from the air,
preventing rust, mildew and corrosion during storage
and shipping. Visit Beachfilters.com for more information.

Sta-dri® Desiccant Bags

Sta-Dri® bags consist of clay desiccant in granular form in a
spun-bonded polyester pouch and
are placed in shipping cartons or
storage spaces to absorb moisture.

They control moisture in both
storage and shipping environments
to below 40% relative humidity.

- Ideal for any industrial application
- Non-toxic, non-corrosive, totally inert,
environmentally safe
- Moisture pick-up is slow and consistent
- Effective in areas up to 15 cubic feet per pound of
Sta-Dri®
- Active ingredient remains dry to the touch, even
when saturated
- Customize Sta-Dri Pouches with your company logo.
Contact us for details.
- Reusable up to 3 times
- Available in 1, 2 and 4 pound pouches

Container Dri® II Desiccant

Container Dri consists of an
advanced formula of granules in a
Tyvek® envelope that turns
moisture into a thick, no-spill gel.
This desiccant formulation controls
moisture and dew point
temperatures in
shipping containers.

- Idea for industrial uses, especially in
container shipping
- Effective in areas up to 50 ft³ per envelope
- Active ingredients calcium chloride and starch absorb
moisture and trap it as a thick, no-spill gel
- Single use
- Available in 125 gram adhesive-backed single
envelope or strips of 6 envelopes

Complimentary Samples are available. Call or e-mail Lori at
717-235-1136 or beachsta-dri@comcast.net.
