Sta-Dri® Desiccant Bags Case Study

Customer: Electrical Panels Worldwide

Product Used: Beach SD-8, SD-16, SD-32, SD-64 Sta-Dri® Desiccant Bags

Application: When maintenance managers think about the critical importance of keeping their electrical panels dry and free from damaging moisture, they put a Sta-Dri® desiccant pouch inside.

Whether its outside on an oil rig or inside a hot moisture laden plant, damaging moisture can leak into your electrical panels and cause problems with critical components like PLCs.

There are many happy customers in both plants and oil fields who appreciate the protection from Sta-Dri®, a very inexpensive insurance policy for their electrical and electronic components.

Other Merchandising:

- Both Technical Sales sheets and brochures are available on beachfilters.com for download. Use them in next sales meeting as a reminder to your team of this useful problem-solver.

Testimonials: needed for compressed air filters, breathers and Sta-Dri desiccant pouches. Fill out the form on beachsta-dri.com for a nice reward. [CLICK HERE](#)

Stop Moisture Threats inside Electrical Panels

Prevention is low cost and so are our pouches.

Protect your customers' valuable electrical components from corrosion and mildew: Safe, non-toxic

Sta-Dri® clay desiccant pouches.

Got PLC's, switches? Get Sta-Dri®

Sta-Dri® Desiccant Bags

Sta-Dri® bags consist of clay desiccant in granular form in a 100% spun-bonded polyester pouch and are placed in shipping cartons or storage spaces to absorb moisture. Controls moisture in both storage and shipping environments below 40% relative humidity

- Ideal for any industrial application
 - Non-toxic, non-corrosive, totally inert , environmentally safe
 - Moisture pick-up is slow and consistent
- Effective in areas up to 15 cubic feet per pound of Sta-Dri®
- Provides a long term cost savings for your customer's preventive maintenance effort
- Active ingredient remains dry to the touch, even when saturated
- Reusable up to 3 times
- Available in four sizes
