

BEACH FILTERS

Clear The Air

HAPPINESS IS A FRESH NEW FILTER!

A dirty filter can lead to decreases in the performance of vital equipment. It's best practice to check and/or replace your first line of defense every 3 to 6 months. All filter elements and breathers need to be properly maintained to stay at peak performance.

Beach Desiccant Filter Elements:

- Particulate Filtration to .3 micron
- Eliminate Moisture and Hydrocarbon Vapors
- Desiccants available for all housings
 - Standard clay
 - Silica Gel
 - Carbon
 - Custom

Filter housings need maintenance too.

Inquire about our maintenance kits that include replacement o-rings, scrubbers, and elements.

Pink breathers need to be replaced.

Check for any color change in all Beach Breather Products -->
Standard disposables, AquaGuard low flow, Extreme Duty, Extended Series, and Re-buildable Steel

Use the [HANDY BREATHER SELECTION GUIDE](#) to find the best option your customers.
