FILTERS*Clear The Air***STA-DRI** by Beach**STA-DRI IS IDEAL FOR LONG TERM,**

corrosion sensitive applications in both storage and shipping. Environmentally friendly being made from bentonite clay, it remains dry to the touch even when completely saturated.

1. Clay desiccants are among the most economical products used for moisture protection and are less expensive compared to other desiccants like silica gel or molecular sieve¹.

2. Clay is a natural material extracted from the earth and contributes to sustainability while reducing environmental impact.

3. Clay desiccants have a significant moisture-absorbing capacity and can absorb roughly 30% of their weight in water vapor, making them effective in relatively humid environments.

4. Clay desiccants are straightforward to use and require no special handling or precautions. Additionally, they can be reactivated by baking, allowing for repeated use.

In short: clay desiccants offer a balance of effectiveness, affordability, and environmental friendliness. Consider these benefits when choosing desiccants for your specific needs!

Industry Highlight: Sta-dri is a highly effective desiccant that provides exceptional use in electrical control panels on maritime vessels. Captains and engineers with Norfolk Dredging ask for Sta-Dri by name. They work on projects all along the Atlantic coast, from New England, all the way down to the Gulf Coast and Caribbean. Sta-dri effectively absorbs moisture, preventing condensation and dampness within electrical control panels allowing these sensitive electronic components to maintain their reliability and longevity. Safeguards against corrosion and other hazards that might cause electrical fires are put in place when used. Any moisture-related damage is significantly reduced and control panels remain dry effectively extending the life of components and reducing maintenance costs. Sta-dri is a clear choice in the harsh environment the Atlantic Ocean provides for any dredging project.

Distributor support includes:

- Shipping Within 24 Hours
- Personal Service On Every Order
